Here are some instructions to help you get started with the labs.

There will always be two TAs in the labs during the scheduled lab hours. Our names are Kael, Venu, Lily, Nicole, Gabe, John, Lu, and Sandra. We can help you with any problem or question you might have. You can do these labs from home as long as you have a Java enabled browser like Netscape, Mozilla, or Internet Explorer. You will always be able to work on a terminal during your scheduled lab hours and you can also come for the other lab hours as long as there is space. Furthermore, you can use the labs when there is no other class booked.

All sections meet in LSK 121. If you have not taken Math 102 last semester, please be sure to attend on of the labs in the week of Jan 11-14, even if you are not registered to attend that week.

Here’s what you need to do to work on the labs.

• If the screen in front of you does is not a list of servers, log out of the account. If it is a login/password screen you may need to enter ctrl – c to exit.

• On the screen you will see several server names. Choose any of the windows servers and click Accept.

• You will now see a screen ‘Log On to Windows’ asking for your user ID and password. Your user ID is composed from your names: firstmiddlelast, all in lower case and without spaces, until you reach 8 letters. Your password is of the form S******* and you replace the stars with the first 7 digits of your student number. Then click ok.

• To start the browser double-click either the Firefox or InternetExplorer icon.

• Once the browser has loaded, you should see a page with a link to Math 103 Homepage. If you don’t, click in the skinny box that says location: and type in the address of the course home page, then hit enter. This is where you want to start for every lab.

• To log into MathSheet–only neccessary if you want to save or load work–use the same username and password you used to log into the windows server, and type 103 as your group name if you wish to view the mathsheet solutions to previous labs.

• Once you’re finished you can leave. Don’t forget to logout first by closing the browser and choosing the logout option from the lower-left ‘start’ menu.

We are here to help you so please ask us questions! We hope you have a great term and enjoy the labs!
